Waste and Technology industries to help you build a more  
competitive business.

**CASCADE**  
cart solutions

a cascade engineering company

# When it's your name on the trucks and your future on the line, which partner best meets your need for superior waste and recycling technology?

## Now you know.

Cascade Cart Solutions is the leading provider of turnkey, end-to-end technology solutions for the rapidly evolving waste and recycling industry. By employing knowledgeable specialists from the waste, recycling and IT fields, and integrating continuous feedback from our customers, we're setting the highest standards for innovation, quality, and ease of use. We're helping our customers improve their operations, increase customer satisfaction and stay one step ahead of their competitors with the CapturIT™ Onboard Intelligence system, the industry's only onboard truck system technology developed solely for the waste industry.

## So now you can:

- Get real-time, 100% accurate information from every customer, every truck, on every route.
- Gauge efficiency by the month, the week, the day – even by the hour.
- Maximize revenue collection by verifying every collection is tied to an invoice.
- Know your costs and ROI daily, weekly, monthly.
- Accurately project costs against revenue to prepare bids more confidently.
- Offer pay by weight, volume, service and PAYT programs to be more competitive in your community.
- Reduce missed pickups and drive-backs that cost you fuel and personnel hours.
- Increase customer satisfaction by responding to inquiries quickly and professionally.
- Increase landfill diversion and enhance community recycling programs with specific data you capture.
